

POPULATION : ARKANSAS

COMPOSITION AND CHARACTERISTICS OF THE POPULATION

Prepared under the supervision of WM. C. HUNT, Chief Statistician for Population

The first population bulletin for Arkansas gave the number of inhabitants by counties and minor civil divisions, the decennial increase and the density of population, and the proportion urban and rural. The present bulletin deals with the composition and characteristics of the population. The two bulletins cover all the principal topics of the population census, except occupations and ownership of homes.

Description of the tables.—The greater part of this second bulletin consists of four general tables, which present statistics of color, nativity, parentage, sex, citizenship, illiteracy, school attendance, and dwellings and families, as follows: Table I for the state and counties; Table II for Little Rock, the only city of more than 25,000 inhabitants; Table III for cities of 10,000 to 25,000; and Table IV for places of 2,500 to 10,000.

A series of summary tables (numbered 1 to 14) reproduces from the general tables the more important state and city totals, and presents also certain additional data relative to state of birth, age, and marital condition.

On account of the wide differences in characteristics among different classes of the population, the statistics on each subject are shown according to race, and for the whites according to nativity and parentage. Classification according to nativity and parentage is scarcely necessary for the other races, since nearly all negroes and Indians are native of native parentage, and nearly all Chinese and Japanese either foreign born or of foreign parentage.

The white population is divided into four groups: (1) Native, native parentage—that is, having both parents born in the United States; (2) native, foreign parentage—having both parents born abroad; (3) native, mixed parentage—having one parent native and the other foreign born; (4) foreign born. As the second and third classes do not differ greatly in characteristics, they are combined in some of the tables; in a few cases all three native white classes are combined.

Since marked differences often exist between urban and rural communities with respect to the composition and characteristics of the population, the two classes are distinguished in connection with several of the subjects. Urban population, as defined by the Bureau of the Census, includes that of all incorporated places of 2,500 inhabitants or more, the remainder being classified as rural.

The census inquiry as to school attendance was merely as to whether the person enumerated had attended any kind of school at any time from September 1, 1909, to the date of enumeration, April 15, 1910.

The Census Bureau classifies as illiterate any person 10 years of age and over who is unable to write, regardless of ability to read.

Color and nativity (Table 1).—Of the total population of Arkansas, 1,131,026, or 71.8 per cent, are whites, and 442,891, or 28.1 per cent, negroes. The corresponding percentages in 1900 were 72 and 28. In 14 of the 75 counties more than half of the population are negroes, the highest percentages being 84.6 in Crittenden County, 80.4 in Chicot, 79.4 in Desha, 78.6 in Phillips, and 78.4 in Lee; in 26 counties, on the other hand, negroes form less than 5 per cent of the total. (See map on a following page.)

Native whites of native parentage constitute 68.4 per cent of the total population of the state, and 95.3 per cent of the white population. Native whites of foreign or mixed parentage constitute only 2.3 per cent of the total population, and foreign-born whites 1.1 per cent.

Of the urban population, 61 per cent are native whites of native parentage; of the rural population, 69.5 per cent. The corresponding proportions for native whites of foreign or mixed parentage are 6.7 and 1.7 per cent, respectively. The percentage of foreign-born whites is 3 in the urban population and 0.8 in the rural; the percentage of negroes is 29.2 in the urban and 28 in the rural.

Sex (Table 2).—In the total population of the state there are 810,026 males and 764,423 females, or 106 males to 100 females. In 1900 the ratio was 106.1 to 100. Among the whites there are 107.7 males to 100 females; among the negroes 101.7. For all native whites combined the ratio is 107 to 100, as compared with 168.3 to 100 for the foreign-born whites. In the urban population there are 100.4 and in the rural 106.8 males to 100 females, the urban population being very nearly evenly divided by sex, while in the rural the males outnumber the females.

State of birth (Tables 3 and 4).—Of the native population—that is, population born in the United States—67.8 per cent were born in Arkansas and 32.2 per cent outside the state; of the native white population, 31.8 per cent were born outside the state, and of the native negro, 33.1 per cent. Persons born outside the state constitute a much larger proportion of the native population in urban than in rural communities.

Foreign nationalities (Table 5).—Of the foreign-born white population, persons born in Germany represent 34.4 per cent; Italy, 10; England, 9; Austria, 7.5; Ireland, 6.4; Canada, 6.3; Switzerland, 4.8; Russia, 4.5; Scotland, 2.6; France, 2.3; Sweden, 2.3; other countries, of which 8 are specified in Table 5, 10.2 per cent. Of the total white stock of foreign origin, which includes persons born abroad and also natives having one or both parents born abroad, Germany contributed 38.5 per cent; England, 10.7; Ireland, 10.4; Canada, 5.7; Italy, 5; Austria, 4.8; Switzerland, 3.7; Scotland, 3.2; France, 2.6; Russia, 2.6 per cent.

Voting and militia ages (Table 6).—The total number of males 21 years of age and over is 395,824, representing 25.1 per cent of the population. Of such males, 71.8 per cent are white and 28.1 per cent negroes. Native whites represent 69.4 per cent of the total number and foreign-born whites 2.5 per cent. Of the 9,718 foreign-born white males of voting age, 5,284, or 54.4 per cent, are naturalized. Males of militia age—18 to 44—number 311,792.

Age (Tables 7, 8, and 12).—Of the total population, 14.7 per cent are under 5 years of age, 24.7 per cent from 5 to 14 years, inclusive, 20.6 per cent from 15 to 24, 25.1 per cent from 25 to 44, and 14.7 per cent 45 years of age and over. The foreign-born white population comprises comparatively few children, only 5 per cent of this class being under 15 years of age, while more than five-sixths (85.4 per cent) are 25 years of age and over. The negro population comprises a somewhat smaller proportion of children under 5 than the native white population of native parentage.

The urban population shows a smaller proportion of children than the rural, and a larger proportion of persons in the prime of life. Migration to the city explains this at least in part. Of the urban population, 33.2 per cent are from 25 to 44 years of age, inclusive, and of the rural population, 23.9 per cent.

School attendance (Table 9).—The total number of persons of school age—that is, from 6 to 20 years, inclusive—is 551,672, of whom 324,035, or 58.7 per cent, attended school. In addition to these, 4,324 persons under 6 and 5,436 of 21 and over attended school. For boys from 6 to 20 years, inclusive, the percentage attending school was 58.7; for girls, 58.8. For children from 6 to 14 years, inclusive, the percentage attending school was 70.1. The percentage for children of this age was highest in the small group of native whites of foreign or mixed parentage, 81.2, followed by native whites of native parentage, 74.7; negroes, 58.2; and foreign-born whites, 55.8. (See Table I.) In urban communities the percentage of children of that age attending school was 82.3; in rural communities, 68.8.

Illiteracy (Table 10).—There are 142,954 illiterates in the state, representing 12.6 per cent of the total population 10 years of age and over, as compared with 20.4 per cent in 1900. The percentage of illiteracy is 26.4 among negroes, 8.9 among foreign-born whites,

7.1 among native whites of native parentage, and 2.8 among native whites of foreign or mixed parentage.

Illiterates are relatively fewer in urban than in rural communities, the percentages being 6.4 and 13.6, respectively. This difference between urban and rural communities appears in each class of the population, although in other sections of the country the percentage for foreign-born whites, most of whom arrive in this country when past the school age, is practically the same in urban as in rural communities.

For persons from 10 to 20 years of age, inclusive, whose literacy depends largely upon present school facilities and school attendance, the percentage of illiteracy is 7.8. (See Table I.)

Marital condition (Tables 11 and 13).—In the population 15 years of age and over, 34.3 per cent of the males are single and 23.7 per cent of the females. The percentage married is 58.9 for males and 64 for females; and the percentage widowed 5.9 and 11.3, respectively. The percentages divorced, 0.5 and 0.8, respectively, are believed to be too small, because of the probability that many divorced persons class themselves as single or widowed.

That the percentage single is so much smaller for women than for men is due largely to the fact that they marry younger. Thus, 21.1 per cent of the females from 15 to 19 years of age are married, as compared with 2 per cent of the males; and 65.2 per cent of the females from 20 to 24 years are married, as compared with 35.9 per cent of the males. For those from 25 to 34 the percentages are, respectively, 83.3 and 73.7. In the next age group, 35 to 44 years, the difference practically disappears. That there is a larger proportion of widows than of widowers may indicate that men more often remarry than women, but, since husbands are generally older than their wives, the marriage relationship is more often broken by death of the husband than by death of the wife.

For each of the main elements of the population the percentage of married persons among those over 15 years of age is as follows: Foreign-born whites, 63.9 for males, 69 for females; native whites of native parentage, 59.2 and 65.5, respectively; native whites of foreign or mixed parentage, 53.8 and 58.4, respectively; negroes, 58.1 for males and 60.9 for females.

These percentages by no means indicate the relative tendency of the several classes as regards marriage. To determine that, the comparison should be made by age periods, since the proportion married in any class is determined largely by the proportion who have reached the marrying age. Similarly, the proportion widowed depends largely on the proportion past middle life. The percentage married, for each sex, is higher in rural than in urban communities.

Dwellings and families.—The total number of dwellings in Arkansas is 327,625, and the total number of families 333,368, indicating that in very few cases does more than one family occupy a dwelling. (See Table I.) The average number of persons per dwelling is 4.8, and the average number per family 4.7.

POPULATION : CALIFORNIA

COMPOSITION AND CHARACTERISTICS OF THE POPULATION

Prepared under the supervision of WM. C. HUNT, Chief Statistician for Population

The first population bulletin for California gave the number of inhabitants by counties and minor civil divisions, the decennial increase and the density of population, and the proportions urban and rural. The present bulletin deals with the composition and characteristics of the population. The two bulletins cover all the principal topics of the population census except occupations and ownership of homes.

Description of the tables.—The greater part of this second bulletin consists of five general tables, which present statistics of color, nativity, parentage, sex, citizenship, illiteracy, school attendance, and dwellings and families, as follows: Table I for the state and counties; Table II for cities of more than 25,000 inhabitants; Table III for cities of 10,000 to 25,000; Table IV for places of 2,500 to 10,000; and Table V for wards or assembly districts of the three cities of more than 50,000.

A series of summary tables (numbered 1 to 17) reproduces from the general tables the more important state and city totals, and presents also certain additional data relative to state of birth, age, and marital condition.

On account of the wide differences in characteristics among the different classes of the population, the statistics on each subject are shown according to race, and for the whites according to nativity and parentage. Classification according to nativity and parentage is scarcely necessary for the other races, since nearly all negroes and Indians are native born of native parentage, and nearly all Chinese and Japanese either foreign born or of foreign parentage.

The white population is divided into four groups: (1) Native, native parentage—that is, having both parents born in the United States; (2) native, foreign parentage—having both parents born abroad; (3) native, mixed parentage—having one parent native and the other foreign born; (4) foreign born. As the second and third classes do not differ greatly in characteristics, they are combined in some of the tables; in a few cases all three native white classes are combined.

Since marked differences often exist between urban and rural communities with respect to the composition and characteristics of the population, the two classes are distinguished in connection with several of the subjects. Urban population, as defined by the Bureau of the Census, includes that of all incorporated places of 2,500 inhabitants or more, the remainder being classified as rural.

The census inquiry as to school attendance was merely as to whether the person enumerated had

attended any kind of school at any time between September 1, 1909, and the date of enumeration, April 15, 1910.

The Census Bureau classifies as illiterate any person 10 years of age or over who is unable to write, regardless of ability to read.

Color and nativity (Table 1).—Of the total population of California, 1,106,533, or 46.5 per cent, are native whites of native parentage; 635,889, or 26.8 per cent, are native whites of foreign or mixed parentage; and 517,250, or 21.8 per cent, are foreign-born whites. The corresponding percentages in 1900 were 43.4, 29.7, and 21.3, respectively, the proportion of native whites of native parentage increasing somewhat during the decade. In 1910 Japanese constituted 1.7 per cent of the population; Chinese, 1.5; negroes, 0.9; and Indians, 0.7. In 8 of the 58 counties the foreign-born whites represent as much as one-fourth of the population, the percentage being highest (32) in San Mateo. The proportion of native whites of foreign or mixed parentage exceeds one-fourth in 24 counties and is highest in San Francisco County (36.9 per cent). (See maps on a following page.)

Of the urban population, 44.4 per cent are native whites of native parentage; of the rural, 50 per cent. The corresponding proportions for native whites of foreign or mixed parentage are 28.8 and 23.5 per cent, respectively; for foreign-born whites 22.6 and 20.4 per cent. The percentage of Chinese and Japanese is 3 in the urban and 3.8 in the rural.

Sex (Tables 2 and 14).—In the total population of the state there are 1,322,978 males and 1,054,571 females, or 125.5 males to 100 females. In 1900 the ratio was 123.5 to 100. Among native whites the ratio is 108.7 to 100 and among foreign-born whites, 169.6 to 100. In the urban population there are 113.6 males to 100 females, and in the rural, 147.8.

State of birth (Tables 3 and 4).—Of the native population—that is, population born in the United States—50.5 per cent were born in California and 49.5 per cent outside the state; of the native white population, 49.9 per cent were born outside the state; of the native negro, 75.6 per cent; and of the native Indian, 6.4 per cent. Persons born outside the state constitute a larger proportion of the native population in urban than in rural communities.

Foreign nationalities (Tables 5 and 12).—Of the foreign-born white population of California, persons born in Germany represent 14.8 per cent; Italy, 12.3; Ireland, 10.1; England, 9.4; Canada, 8.6; Mexico, 6.5;

POPULATION—CALIFORNIA.

Sweden, 5.1; Portugal, 4.3; France, 3.4; Austria, 3.3; Russia, 3.2; all other countries, 18.8 per cent. Of the total white stock of foreign origin, which includes persons born abroad and also natives having one or both parents born abroad, Germany contributed 17.9 per cent; Ireland, 13.8; England, 10; Italy, 8.9; Canada, 8.4; Portugal, 4.5; Mexico, 4.4; Sweden, 4; France, 2.8; Scotland, 2.8; Switzerland, 2.4; Russia, 2.4; Denmark, 2.3 per cent.

Voting and militia ages (Table 6).—The total number of males 21 years of age and over is 920,397, representing 38.7 per cent of the population. Of such males, 40 per cent are native whites of native parentage, 19.7 per cent native whites of foreign or mixed parentage, 32.3 per cent foreign-born whites, 6.5 per cent Chinese and Japanese, 0.9 per cent negroes, and 0.5 per cent Indians. Of the 297,365 foreign-born white males of voting age, 137,274, or 46.2 per cent, are naturalized. Males of militia age—18 to 44—number 665,522.

Age (Tables 7, 8, 13, and 14).—Of the total population, 8.1 per cent are under 5 years of age, 14.7 per cent from 5 to 14 years, inclusive, 18 per cent from 15 to 24, 35.7 per cent from 25 to 44, and 23.1 per cent 45 years and over. The proportion of children is low among the foreign-born whites, negroes, Chinese, and Japanese. Only 4.2 per cent of the foreign-born whites are under 15 years of age, while 82.9 per cent are 25 years of age and over. Of the native whites of foreign or mixed parentage, 47.5 per cent are 25 and over, and of the native whites of native parentage, 52.9 per cent.

The urban population shows a smaller proportion of children than the rural and a larger proportion of persons in the prime of life. Migration to the city explains this at least in part. Of the urban population, 37.3 per cent are from 25 to 44 years of age, inclusive, and of the rural, 32.9 per cent.

School attendance (Table 9).—The total number of persons of school age—that is, from 6 to 20 years, inclusive—is 555,554, of whom 361,077, or 65 per cent, attended school. In addition to these, 6,788 children under 6 and 9,801 persons of 21 and over attended school. For boys from 6 to 20 years, inclusive, the percentage attending school was 63.1; for girls, 67. For children from 6 to 14 years, inclusive, the percentage attending school was 86.9. The percentage for children of this age among native whites of native parentage was 87.4; among native whites of foreign or mixed parentage, 88.1; among foreign-born whites, 82.3; among negroes, 88.4; among Indians, 61.4; among Chinese, 70.1; and among Japanese, 61.5. (See Table 9.) For all classes combined, the percentage attending school is somewhat higher in urban than in rural communities.

Illiteracy (Table 10).—There are 74,902 illiterates in the state, representing 3.7 per cent of the total population 10 years of age and over, as compared with 4.8 per cent in 1900. The percentage of illiteracy is 0.5 among native whites, 10 among foreign-born

whites, 7.1 among negroes, 49 among Indians, 15.5 among Chinese, and 8.6 among Japanese.

For all classes combined, the percentage of illiteracy is 2.4 in urban communities and 5.9 in rural. For each class separately, the rural percentage exceeds the urban, the differences in some cases being very marked.

For persons from 10 to 20 years of age, inclusive, whose literacy depends largely upon present school facilities and school attendance, the percentage of illiteracy is 1.7. (See Table I.)

Marital condition (Tables 11 and 16).—In the population 15 years of age and over, 45.8 per cent of the males are single and 27.9 per cent of the females. The percentage married is 47.3 for males and 58.1 for females; and the percentage widowed 4.4 and 12.2, respectively. The percentages of those reported as divorced, 1 and 1.3, respectively, are believed to be too small, because of the probability that many divorced persons class themselves as single or widowed.

That the percentage single is so much smaller for women than for men is due partly to the excess of males in the total population, and partly to the fact that women marry younger. Thus 9.1 per cent of the females from 15 to 19 years of age are married, as compared with 0.6 per cent of the males; and 47.2 per cent of the females from 20 to 24 years are married, as compared with 14.8 per cent of the males. In the next age group, 25 to 34 years, the percentages are 72.4 and 46, respectively. In the age group 35 to 44 the difference is less marked, while among those aged 45 and over the percentage for males exceeds that for females. That there is a larger proportion of widows than of widowers may indicate that men more often remarry than women, but, since husbands are generally older than their wives, the marriage relationship is more often broken by death of the husband than by death of the wife.

For the main elements of the population the percentages of married persons among those 15 years of age and over are as follows: Foreign-born whites, 49.8 for males and 65.1 for females; native whites of native parentage, 49.7 and 57.6, respectively; native whites of foreign or mixed parentage, 42.4 and 53.5; negroes, 48.9 and 55.8; Indians, 50.3 and 59.2; Chinese, 44.7 and 69; Japanese, 28 and 86.8.

These percentages by no means indicate the relative tendency of the several classes as regards marriage. To determine that, the comparison should be made by age periods, since the proportion married in any class is determined largely by the proportion who have reached the marrying age. Similarly, the proportion widowed depends largely on the proportion past middle life. The percentage married for males is higher in the urban population, for females in the rural.

Dwellings and families.—The total number of dwellings in California is 513,481, and the total number of families 563,636, there being 109.8 families to each 100 dwellings. (See Table I.) The average number of persons per dwelling is 4.6, and the average number per family, 4.2.

NOTE 1.—*Imperial and San Diego Counties combined.*—Total population: 1910, 75,256; 1900, 35,090; increase, 1900–1910, 40,166; per cent of increase, 114.5. Urban population—1910, 39,578; same places in 1900, 17,700; per cent of increase, 123.6. Rural population—1910, 35,678; same territory in 1900, 17,390; per cent of increase, 105.2. Urban population—1900, 17,700; rural population—1900, 17,390. Per cent in places of 2,500 or more in 1910, 52.6. Percent in places of 2,500 or more in 1900, 50.4.

NOTE 2.—In computing this increase the population of Indian reservations in 1900 has been deducted from the total population of the county in order to make that total comparable with the total for 1890, which does not include the population of Indian reservations. The population thus deducted in the several counties was as follows: Humboldt, 1,112; Mendocino, 599; Riverside, 203; San Diego, 817; Tulare, 143.

POPULATION : COLORADO

COMPOSITION AND CHARACTERISTICS OF THE POPULATION

Prepared under the supervision of WM. C. HUNT, Chief Statistician for Population

The first population bulletin for Colorado gave the number of inhabitants by counties and minor civil divisions, the decennial increase and the density of population, and the proportion urban and rural. The present bulletin deals with the composition and characteristics of the population. The two bulletins cover all the principal topics of the population census except occupations and ownership of homes.

Description of the tables.—The greater part of this second bulletin consists of five general tables, which present statistics of color, nativity, parentage, sex, citizenship, illiteracy, school attendance, and dwellings and families, as follows: Table I for the state and counties; Table II for the three cities of more than 25,000 inhabitants; Table III for Trinidad, the only city of 10,000 to 25,000; Table IV for places of 2,500 to 10,000; and Table V for wards of Denver, the only city of more than 50,000 inhabitants.

A series of summary tables (numbered 1 to 15) reproduces from the general tables the more important state and city totals, and presents also certain additional data relative to state of birth, age, and marital condition.

On account of the wide differences in characteristics among the different classes of the population, the statistics on each subject are shown according to race, and for the whites according to nativity and parentage. Classification according to nativity and parentage is scarcely necessary for the other races, since nearly all negroes and Indians are native born of native parentage, and nearly all Chinese and Japanese either foreign born or of foreign parentage.

The white population is divided into four groups: (1) Native, native parentage—that is, having both parents born in the United States; (2) native, foreign parentage—having both parents born abroad; (3) native, mixed parentage—having one parent native and the other foreign born; (4) foreign born. As the second and third classes do not differ greatly in characteristics, they are combined in some of the tables; in a few cases all three native white classes are combined.

Since marked differences often exist between urban and rural communities with respect to the composition and characteristics of the population, the two classes are distinguished in connection with several of the subjects. Urban population, as defined by the Bureau of the Census, includes that of all incorporated places of 2,500 inhabitants or more, the remainder being classified as rural.

The census inquiry as to school attendance was merely as to whether the person enumerated had attended any kind of school at any time from September 1, 1909, to the date of enumeration, April 15, 1910.

The Census Bureau classifies as illiterate any person 10 years of age or over who is unable to write, regardless of ability to read.

Color and nativity (Table 1).—Of the total population of Colorado, 475,136, or 59.5 per cent, are native whites of native parentage; 181,428, or 22.7 per cent, are native whites of foreign or mixed parentage; 126,851, or 15.9 per cent, are foreign-born whites; and 11,453, or 1.4 per cent, are negroes. The corresponding percentages in 1900 were 57.7, 23.6, 16.8, and 1.6, respectively, the comparison indicating very slight changes in the color, nativity, and parentage composition of the population. Among the individual counties the proportion of whites of foreign birth ranges from less than 5 per cent in 3 counties to 43.8 per cent in San Juan, and the proportion of native whites of foreign or mixed parentage from 7 per cent in Costilla County to 43.6 per cent in Gilpin. (See maps on a following page.)

Of the urban population, 56.9 per cent are native whites of native parentage; of the rural population, 62.1 per cent. The corresponding proportions for native whites of foreign or mixed parentage are 24.7 and 20.7 per cent, respectively. The percentage of foreign-born whites is 15.7 in the urban population and 16 in the rural; the percentage of negroes is 2.3 in the urban and 0.5 in the rural.

Sex (Table 2).—In the total population of the state there are 430,697 males and 368,327 females, or 116.9 males to 100 females. In 1900 the ratio was 120.9 to 100. Among native whites the ratio is 109.7; among foreign-born whites 160.1. In the urban population there are 104.4 males to 100 females, and in the rural, 131.5.

State of birth (Tables 3 and 4).—Of the native population—that is, population born in the United States—34.9 per cent were born in Colorado and 65.1 per cent outside the state; of the native white population, 64.9 per cent were born outside the state, and of the native negro, 81 per cent. Persons born outside the state constitute a somewhat larger proportion of the native population in urban than in rural communities.

Foreign nationalities (Tables 5 and 12).—Of the foreign-born white population, persons born in Germany represent 13.5 per cent; Italy, 11.3; Russia, 10.7; Austria, 10.3; England, 10.2; Sweden, 9.8;

POPULATION—COLORADO.

Canada, 7.5; Ireland, 6.9; Scotland, 3.4; Denmark, 2.2; Mexico, 2; all other countries, 12.4 per cent. Of the total white stock of foreign origin, which includes persons born abroad and also natives having one or both parents born abroad, Germany contributed 18.1 per cent; England, 11.9; Ireland, 10.7; Sweden, 8.2; Canada, 7.8; Italy, 7.8; Russia, 7.3; Austria, 6.9; Scotland, 3.8; Denmark, 1.9 per cent.

Voting and militia ages (Table 6).—The total number of males 21 years of age and over is 271,648, representing 34 per cent of the population. Of such males, 54.2 per cent are native whites of native parentage, 17.2 per cent native whites of foreign or mixed parentage, 26 per cent foreign-born whites, and 1.6 per cent negroes. Of the 70,514 foreign-born white males of voting age, 35,245, or 50 per cent, are naturalized. Males of militia age—18 to 44—number 203,982.

Age (Tables 7, 8, and 13).—Of the total population, 10.3 per cent are under 5 years of age, 18.2 per cent from 5 to 14 years, inclusive, 18.8 per cent from 15 to 24, 33.1 per cent from 25 to 44, and 19.2 per cent 45 years of age and over. The foreign-born white population comprises comparatively few children, only 5.6 per cent of this class being under 15 years of age, while more than four-fifths (81.1 per cent) are 25 years of age and over. Of the native whites of foreign or mixed parentage, only 41.8 per cent are 25 and over, and of the native whites of native parentage, 48.5 per cent.

The urban population shows a somewhat smaller proportion of children than the rural and a larger proportion of persons in the prime of life. Migration to the city explains this at least in part. Of the urban population, 35.5 per cent are from 25 to 44 years of age, inclusive, and of the rural population, 30.7 per cent.

School attendance (Table 9).—The total number of persons of school age—that is, from 6 to 20 years, inclusive—is 215,940, of whom 147,626, or 68.4 per cent, attended school. In addition to these, 2,483 persons under 6 and 3,303 of 21 and over attended school. For boys from 6 to 20 years, inclusive, the percentage attending school was 67.4; for girls, 69.3. For children from 6 to 14 years, inclusive, the percentage attending school was 86.7. The percentage for children of this age among native whites of foreign or mixed parentage was 88.4; among native whites of native parentage, 86.4; among negroes, 85.4; and among foreign-born whites, 81.7. (See Table I.) In urban communities the percentage of children of that age attending school was 89.3, in rural communities, 84.6.

Illiteracy (Table 10).—There are 23,780 illiterates in the state, representing 3.7 per cent of the total population 10 years of age and over, as compared with 4.2 per cent in 1900. The percentage of illiteracy is 11.3 among foreign-born whites, 8.6 among negroes, and 1.6 among native whites, these percentages being lower than the corresponding figures for 1900 for each class except the foreign-born whites, whose percentage of illiteracy in 1900 was 8.1.

For all classes combined, the proportion of illiterates is lower in urban than in rural communities, the percentages being 2.4 and 5.2, respectively.

For persons from 10 to 20 years of age, inclusive, whose literacy depends largely upon present school facilities and school attendance, the percentage of illiteracy is 1.6. (See Table I.)

Marital condition (Tables 11 and 14).—In the population 15 years of age and over, 41.2 per cent of the males are single, and 25.8 per cent of the females. The percentage married is 53.2 for males and 62.8 for females, and the percentage widowed, 4.3 and 10.1, respectively. The percentages of those reported as divorced, 0.9 and 1.2, respectively, are believed to be too small, because of the probability that many divorced persons class themselves as single or widowed.

That the percentage single is so much smaller for women than for men is partly accounted for by the excess of males in the total population, but is due largely to the fact that women marry younger. Thus 12.4 per cent of the females from 15 to 19 years of age are married, as compared with 0.8 per cent of the males, and 53.8 per cent of the females from 20 to 24 years are married, as compared with 19.9 per cent of the males. In the next age group, 25 to 34 years, the percentages are 78 for females and 56.5 for males, while in the age group 35 to 44 the difference is much less, and of those aged 45 and over a larger percentage are married among males than among females. That there is a larger proportion of widows than of widowers may indicate that men more often remarry than women, but, since husbands are generally older than their wives, the marriage relationship is more often broken by death of the husband than by death of the wife.

For the main elements of the population the percentages of married persons among those 15 years of age and over are as follows: Foreign-born whites, 57.6 for males and 72 for females; native whites of native parentage, 54.1 and 62.5, respectively; native whites of foreign or mixed parentage, 46.1 and 56.5, respectively; negroes, 54.8 for males and 57.2 for females.

These percentages by no means indicate the relative tendency of the several classes as regards marriage. To determine that, the comparison should be made by age periods, since the proportion married in any class is determined largely by the proportion who have reached the marrying age. Similarly, the proportion widowed depends largely on the proportion past middle life. The percentage married for males is higher in urban communities, but for females it is higher in rural.

Dwellings and families.—The total number of dwellings in Colorado is 183,874, and the total number of families, 194,467, indicating that in very few cases does more than one family occupy a dwelling. (See Table I.) The average number of persons per dwelling is 4.3, and the average number per family, 4.1.
